Open to Germany / Europe relocation and remote interviews

PROFESSIONAL SUMMARY

Software engineer with 3.5 years of commercial engineering experience in Java backend systems, geospatial data platforms, and AI applications. Project Lead in a client delivery team at a technology services company, coordinating eight backend engineers while remaining hands-on in implementation. Experienced in translating client requirements into technical delivery, onboarding engineers, and building systems with Spring Boot, PostgreSQL, Redis, Kafka, Spring AI, and LangChain4j.

TECHNICAL SKILLS

Languages	Java 8/17/21, Python, SQL
Backend	Spring Boot, Spring Cloud, Spring AI, LangChain4j, MyBatis, REST APIs
Data	PostgreSQL, PostGIS, MySQL, Redis, Elasticsearch, PgVector
Messaging	Apache Kafka, RabbitMQ
AI Applications	RAG, tool calling, embeddings, vector retrieval, streaming responses
Engineering	Maven, Docker, Git, CI/CD, JUnit, integration testing, AWS fundamentals

WORK EXPERIENCE

iSoftStone Information Technology | Nanjing, China

Mar 2023 - Present

Backend Engineer | Project Lead, Vendor Delivery

- Coordinate an eight-person backend delivery team implementing client-defined business requirements; support hiring, run fortnightly team meetings, prepare weekly delivery reports, and onboard new engineers through hands-on work in active projects.
- Develop road, transit, and facility-data platforms for national infrastructure use cases, covering multi-source ingestion, domain workflows, PostgreSQL/PostGIS schema design, batch processing, and data quality.
- Designed a Python plugin model for extensible data-quality checks and implemented high-volume Java/JDBC processing for million-record geospatial datasets.
- Built a real client AI tour-guide application using Java 21, Spring AI, LangChain4j, PostgreSQL/PgVector, RAG, tool calling, conversation memory, and fallback handling.
- Selected for an internal leadership-development programme and received company recognition for delivery and process-improvement work.

Independent Study & Product Development

Feb 2021 - Feb 2023

Career development period

- Developed a Java backend foundation through structured study and independent implementation, then applied it to NeoPick, a guitar-lesson marketplace case study based on user interviews, personas, competitive analysis, product requirements, and system design.

BeyondSoft Technology | Hangzhou, China

Jul 2020 - Feb 2021

Product Operations Associate | Client: Xiami Music, Alibaba Group

- Supported content and product-operations workflows for a large music-streaming platform, coordinating information between business and technical teams.

SELECTED PERSONAL PRODUCTS

NeoPick

Personal product

[Java 21](#) | [Spring Boot](#) | [PostgreSQL](#) | [Redis](#) | [React](#)

A two-sided marketplace for flexible one-to-one guitar lessons, grounded in original user research.

- Modelled teacher discovery and the booking lifecycle with clear domain boundaries, a booking state machine, authentication, real-time chat, tests, and deployment documentation.

github.com/scoreJlm/NeoPick

AgentSaul

Personal product

[Java](#) | [Spring AI](#) | [Qwen](#) | [PostgreSQL](#) | [Redis](#)

A Java AI application focused on observable agent behaviour rather than a generic chatbot.

- Implemented tool calling, structured output, conversation memory, prompt management, resilience, and SSE streaming.

github.com/scoreJlm/AgentSaul

AI Knowledge Assistant

Personal product

[Python](#) | [FastAPI](#) | [PostgreSQL/PgVector](#) | [React](#) | [Docker](#)

A document question-answering product with an explicit retrieval and grounding pipeline.

- Implemented ingestion, chunking, embeddings, cosine retrieval, grounded streaming answers, and an offline retrieval evaluation harness.

EDUCATION

Suzhou University (Anhui) | Bachelor of Science

Sep 2016 - Jul 2020

[Computer Science](#) | Institution listed as H+ in the German Anabin database

LANGUAGES

Chinese	Native (Mandarin)
English	Professional working proficiency CET-6: 425 Spoken test: B+
German	A1 Actively studying

ADDITIONAL INFORMATION

- Ready to relocate to Germany / Europe and available for remote interviews across European time zones.
- Degree documentation and Anabin recognition materials available for German work-visa processing.
- Portfolio includes live products, source code, architecture notes, and interview-ready case studies.
